)	

I. AUTHORITY

This Unilateral Administrative Order ("Order") is issued pursuant to the authority vested in the President of the United States by Section 106(a) of the Comprehensive Environmental Response, Compensation, and Liability Act of 1980, 42 U.S.C. § 9606(a), as amended ("CERCLA"). The President delegated this authority to the Administrator of the United States Environmental Protection Agency ("EPA" or "Agency") by Executive Order 12580, January 23, 1987, 52 Fed. Reg. 2923, and further delegated it to the Assistant Administrator for Solid Waste and Emergency Response and the Regional Administrators by EPA Delegation Nos. 14-14-A and 14-14-B. This authority has been duly redelegated to the Branch Chief, Superfund Division, EPA Region 9 ("Branch Chief"), by delegations dated September 29, 1997, and November 16,

2001.

II. PARTIES BOUND

1. This Order shall apply to and be binding on the following entities and individuals (collectively referred to as "Respondents"): Alloc Electroplating, Inc. ("Alloc"); and, in their individual capacity, Anilkumar B. Desai ("A. Desai"); Viresh R. Desai ("V. Desai"); Suresh B. Sheth ("Sheth"); and Dharmabhai S. Patel ("Patel"). This Order shall be binding on Respondents and any heirs, agents, officers, employees, successors and assigns. No change in ownership or operational status will alter a Respondent's obligations under this Order. Notwithstanding the terms of any contract or agreement, Respondents are responsible for compliance with this Order and for ensuring that their employees, contractors, and agents comply with this Order.

Respondents shall provide a copy of this Order to all contractors, subcontractors, and consultants that are retained by them to perform the work required by this Order within three (3) days after the Effective Date of this Order or within three (3) days of retaining their services, whichever is later. Respondents are jointly and severally liable for carrying out all activities required by this Order. Compliance or noncompliance by one or more Respondents with any provision of this Order shall not excuse or justify noncompliance by any other Respondent.

2. Respondents may not convey any title, easement, or other interest that they may have in any property comprising the Site, as the term "Site" is defined below, without a provision permitting the continuous implementation of the provisions of this Order. If Respondents wish to transfer any title, easement, or other interest that they may have in any property comprising the Site, Respondents shall provide a copy of this Order to any subsequent owner(s) or successor(s) before any ownership rights are transferred. In such case, Respondents shall advise EPA as soon

as practical prior to any anticipated transfer of interest.

III. DEFINITIONS

3. Unless otherwise expressly provided herein, the terms used in this Order that are defined in CERCLA or in regulations promulgated under CERCLA shall have the meaning assigned to them in CERCLA or in such regulations. Whenever the terms listed below are used in this Order, or in the exhibits attached hereto and incorporated hereunder, the following definitions shall apply:

“Days” shall mean consecutive calendar days unless expressly stated otherwise.

“Working days” shall mean consecutive calendar days other than a Saturday, Sunday, or federal holiday. In computing any period of time under this Order where the last day would fall on a Saturday, Sunday, or federal holiday, the period shall run until the close of business of the next working day.

“CERCLA” shall mean the Comprehensive Environmental Response, Compensation, and Liability Act of 1980, as amended, 42 U.S.C. § 9601 et seq.

“Unilateral Order” or “Order” shall mean this Unilateral Administrative Order, EPA docket number 9-2005-07, and any exhibits attached hereto. In the event of a conflict between this Order and any exhibit, this Order shall control.

“EPA” shall mean the United States Environmental Protection Agency and any successor departments or agencies of the United States.

“National Contingency Plan” or “NCP” shall mean the National Oil and Hazardous Substances Pollution Contingency Plan promulgated pursuant to Section 105 of CERCLA, 42 U.S.C. § 9605, codified at 40 C.F.R. Part 300.

“Paragraph” shall mean a portion of this Order identified by an Arabic numeral.

“Response Action” shall be those specific work items Respondents are required to perform at the Site pursuant to this Order, as set forth in Section IX of this Order.

“Section” shall mean a portion of this Order identified by a Roman numeral, unless otherwise stated.

“Site” shall mean the facility situated on two adjacent parcels that straddle the City of Industry and La Puente in Los Angeles County, California, with separate street addresses of 17855 East Valley Boulevard, City of Industry and 655 Alderton Avenue, La Puente. Additionally, the term Site includes any associated personal property, such as vats, drums, and containers, and other real property at which hazardous substances associated with the operation of this facility have come to be located.

“State” shall mean the state of California, and all of its political subdivisions, including the Department of Toxic Substances Control (“DTSC”).

“United States” shall mean the United States of America.

IV. FINDINGS OF FACT

4. Site description

The Site is located in a mixed commercial/residential neighborhood, and there are residences located immediately north of the Site. The eastern side fronts Alderton Avenue, where there is a significant amount of pedestrian and vehicular traffic.

Prior to the fire on February 6, 2005 that burned the Alloc Electroplating facility to the ground, the facility consisted of four interconnected, concrete warehouse-type buildings and an adjacent parking lot. The interior of the facility included several different plating lines, each with numerous vats; chemical storage areas; a metal polishing area; drying areas; and an office. A portion of the facility included a cyanide treatment system, a water treatment system, and

additional chemical storage areas. At the time of the fire, there were also numerous chemical storage containers and miscellaneous debris at the facility.

The fire completely destroyed the facility and the roof, such that the remaining cross beams had fallen onto the plating areas and debris below.

5. Site ownership and operation

Alloc Electroplating is a California company that began plating operations at the facility in approximately January 2001. A Desai is president and V. Desai is vice president of Alloc, and both men ran the day to day operations at the facility, including management of the hazardous substances and wastes generated at the Site. Sheth and Patel jointly own the two parcels that comprise the real property on which the Site is located, and lease the property to Alloc.

6. Release Characteristics

The fire consumed the majority of the large volumes of plating solutions, chemicals, and rinsates on-site in the vats, drums, and other containers. However, during the fire and subsequent fighting of the fire, several vats were completely destroyed, releasing their contents. Other vats have been observed to have limited freeboard and showed signs of weakness and imminent failure. There remains the potential of segregated pools of acids and cyanide combining and generating hydrogen cyanide gas. The building has been "Red Tagged" by the County of Los Angeles Department of Public Works and there is a realistic potential for complete or partial building collapse, which could produce a catastrophic off-site threat of chemical exposure to nearby residences.

The water sprayed by the fire department ran off the facility property, carrying with it plating solutions, and impacted the nearby storm drains and flowed 900 yards to the San Jose Creek, where it could react violently if commingled with oxidizers.

In addition, with the forecast of heavy winter rains in the Los Angeles area and the lack of secondary containment, there is a significant threat of releases of hazardous substances from the Site to the environment and nearby populations. Further details about the release conditions and this facility are provided in the Memorandum *Request for an Emergency Removal Action at the Alloc Electroplating, Inc. Site* (the “Action Memorandum”), included with this Order as Appendix A.

The materials EPA observed at the Site and referenced in the Action Memorandum are “hazardous substances,” as defined by Section 101(14) of CERCLA, 42 U.S.C. § 9601(14), by meeting requirements set forth respectively in 40 C.F.R. §§ 261.21(a)(1) , 261.22(a)(1), and 261.24.

Threats to public health or the environment stem from the significant potential for releases due to commingling of incompatible substances, heavy rains, deterioration of containers, and collapse of building structures. Commingling of substances, heavy rains, deterioration of containers, and collapse of building structures create an imminent and substantial threat of a catastrophic release of hazardous substances at the Site, and the migration of hazardous substances from the Site.

The administrative record supporting this action is available for review at the EPA, Region 9 offices located at 75 Hawthorne Street, San Francisco, California.

V. CONCLUSIONS OF LAW

7. The Site is a “facility” as that term is defined in Section 101(9) of CERCLA, 42 U.S.C. § 9601(9).

8. Alloc, A. Desai, V. Desai, Sheth, and Patel are each a “person” as that term is defined in Section 101(21) of CERCLA, 42 U.S.C. § 9601(21).

9. Alloc Electroplating leased and operated the Site from approximately January 2001 up until the fire terminated operations. A. Desai and V. Desai, as president and vice president, respectively, ran the day to day operations at the facility, including decisions about handling hazardous substances. Sheth and Patel jointly own the two parcels that comprise the Site real property and lease it to Alloc. Accordingly, these Respondents are “liable” within the meaning of Section 107(a) of CERCLA, 42 U.S.C. § 9607(a), and are subject to this Order under Section 106(a) of CERCLA, 42 U.S.C. § 9606(a).

10. Cyanides, strong acids, oxidizers, and numerous heavy metal salts, as identified in the Action Memorandum, are “hazardous substances” as that term is defined in Section 101(14) of CERCLA, 42 U.S.C. § 9601(14). Hazardous substances spilling, emitting, escaping, emptying, and leaking, or threatening to leak from the abandoned Site constitute a “release,” as that term is defined in Section 101(22) of CERCLA, 42 U.S.C. § 9601(22).

11. The actual or threatened release of hazardous substances from the Site constitutes an imminent and substantial endangerment to the public health or welfare or the environment, within the meaning of Section 106(a) of CERCLA, 42 U.S.C. § 9606(a).

VI. DETERMINATIONS

Based on the Findings of Fact and the Conclusions of Law stated herein, the Branch Chief has made the following determinations:

12. That an actual or threatened release of hazardous substances from the Site presents an imminent and substantial endangerment to the public health or welfare or the environment.

13. That conditions at the Site constitute a threat to public health or welfare or the environment based on consideration of the factors stated in the NCP at 40 C.F.R. § 300.415(b),

and that the actions required by this Order are necessary to protect the public health or welfare or the environment.

14. That the actions required by this Order, if properly performed, will be consistent with the NCP, and are appropriate to protect the public health or welfare or the environment.

VII. NOTICE TO THE STATE

15. Pursuant to Section 106(a) of CERCLA, 42 U.S.C. § 9606(a), EPA has notified the State of the issuance of this Order.

VIII. EFFECTIVE DATE

16. This Order is deemed effective on receipt (the “Effective Date”), unless a conference is requested as provided herein. If such a conference is requested, this Order shall be effective the second day following the day of such conference unless modified in writing by EPA.

IX. ORDER

17. Based on the Findings of Fact, Conclusions of Law, and Determinations, EPA hereby orders Respondents to perform the specific work set forth below under the direction of the EPA On Scene Coordinator (“OSC”), as designated in Section XIV, and to comply with all requirements of this Order until EPA provides notice that the Response Action is complete.

A. Work to be Performed

18. Respondents shall immediately restrict access to the Site and, for the duration of the response action required by this Order, Respondents shall not allow any materials, equipment, or any other personal property to be removed from or brought into the facility at the Site without prior EPA approval.

19. Within six (6) days after the Effective Date of this Order, Respondents shall

submit to EPA for approval, a Work Plan for the removal of hazardous substances from the Site. The Work Plan shall provide a concise description of the activities to be conducted to comply with the requirements of this Order, and shall include a proposed schedule for implementing and completing such activities. The Work Plan shall comply with the guidelines for preparation provided in Paragraph 21, below, and at a minimum, shall require the Respondents to perform and complete the following removal activities within twenty-one (21) days after EPA approves the Work Plan pursuant to Paragraphs 21 and 24 of this Order.

- A) For all areas of the Site subject to the control of Respondents and not actively leased and used by another party, sample and characterize all containerized materials within the facility, except those clearly contained in original packaging and clearly labeled as to their contents. Characterization shall include an assessment of whether any hazardous substance is salable product. For each hazardous substance that would be designated salable product, the assessment shall include a statement of the use of the material, the useful life of the material, the value of the material and anticipated consumers of the material;
- B) Perform air monitoring and sampling in accordance with Occupational Safety and Health Administration ("OSHA") regulations during all phases of the removal action, especially when there is a potential for airborne releases of toxic air contaminants. Use operational controls such as dust containment or suppression to abate fugitive dust emissions;
- C) Segregate all hazardous substances to ensure incompatible substances pose no threat of violent reaction, fire, or explosion; remove non-hazardous chemicals to the appropriate solid waste disposal facility, recycling facility or return to

distributor/manufacturer. All hazardous substances that are salable product must be segregated and stored in a proper manner consistent with reasonable commercial practices;

- D) Properly transport and dispose in accordance with all applicable or appropriate regulations, all hazardous substances at the Site or, where feasible, implement alternative treatment or reuse/recycling options. Each transfer of hazardous substances, pollutants or contaminants off-site must be consistent with Section 121(d)(3) of CERCLA, 42 U.S.C. § 9621(d)(3), and the CERCLA Off-Site Rule at 40 C.F.R. § 300.440.
- E) Assess building structures for contamination and remove any remaining grossly contaminated equipment, structures, and debris for proper disposal or other disposition; and
- F) Provide EPA with copies of all documentation related to off-site disposal or other disposition of wastes including, but not limited to, manifests, waste profiles and analytical data and disposal costs.

20. Within three (3) days of the Effective Date of this Order, the Respondents shall provide EPA with documentation that adequately demonstrates their financial ability to complete the work to be performed pursuant to this Order. Examples of adequate financial documentation that EPA may accept include, but are not limited to, a signed contract or guarantee on the part of the Respondents' contractor that it will complete the work to be performed, a letter of credit from a financial institution, or an escrow account for the value of the work to be performed.

21. The Work Plan required in Paragraph 19 shall be reviewed by EPA, which may approve, disapprove, require revisions, or modify the Work Plan. Once approved, the Work Plan

shall be deemed to be incorporated into and made a fully enforceable part of this Order. The Respondents shall implement the Work Plan as finally approved by the EPA. In addition to the requirements listed in Paragraph 19, the Work Plan shall include:

A) A Health & Safety Plan, prepared in accordance with EPA's Superfund Standard Operating Safety Guide, dated June 1992, which complies with all current OSHA regulations applicable to Hazardous Waste Operations and Emergency Response, 29 C.F.R. Part 1910. Respondents shall incorporate all changes to the Health & Safety Plan recommended by EPA and implement the Health & Safety Plan throughout the performance of the removal action; and

B) A Quality Assurance Project Plan ("QAPP") that is consistent with EPA Guidance for Quality Assurance Project Plans (EPA QA/G-5); Preparation of a U.S. EPA Region 9 Field Sample Plan for EPA-Lead Superfund Projects (Document Control No.: 9QA-05-93); and Guidance for the Data Quality Objectives Process (EPA QA/G-4).

22. Respondents shall provide EPA with a written report on completion of the transportation of hazardous substances or wastes for disposal or recycling. This report shall contain a summary of the activities to comply with this Order. Within fifteen (15) days after completing the Response Action, Respondents shall provide EPA with this final summary report, which also shall include all invoices submitted by contractors (which shall identify specific work performed), and copies of all analytical data generated during the Response Action.

23. All documents, including technical reports, and other correspondence to be submitted by the Respondents pursuant to this Order, shall be sent by over-night mail to the following addressees or to such other addressees as EPA hereafter may designate in writing, and shall be deemed submitted on the date received by EPA.

Rich Martyn, Federal On-Scene Coordinator
US Environmental Protection Agency
EPA, Region 9 (SFD-9-2)
75 Hawthorne Street
San Francisco, CA 94105

Respondents shall submit two (2) copies of each document to EPA.

24. EPA shall review, comment, and approve or disapprove each plan, report, or other deliverable submitted by Respondents. All EPA comments on draft deliverables shall be incorporated by the Respondents. EPA shall notify the Respondents in writing of EPA's approval or disapproval of a final deliverable. In the event of any disapproval, EPA shall specify the reasons for such disapproval, EPA's required modifications, and a time frame for submission of the revised report, document, or deliverable. If the modified report, document or deliverable is again disapproved by EPA, EPA first shall notify the Respondents of its disapproval of the resubmitted report, document, or deliverable, and then may draft its own report, document or deliverable and incorporate it as part of this Order, may seek penalties from the Respondents for failing to comply with this Order, and may conduct the remaining work required by this Order and seek to recover costs from Respondents.

25. For purposes of this Order, EPA's authorized representatives shall include, but not be limited to, consultants and contractors hired by EPA to oversee the activities required by this Order.

B. Selection of Contractor(s) and Subcontractor(s)

26. All work performed by or on behalf of Respondents pursuant to this Order shall be performed by qualified individuals or contractors with expertise in hazardous waste site investigation or remediation, unless agreed otherwise by EPA. Respondents shall, within three (3) days after the Effective Date of this Order, notify EPA in writing of the name, title, and

qualifications of the individual(s) who will be responsible for carrying out the terms of this Order, and the name(s) of any contractor(s) or subcontractor(s). The qualifications of the persons, contractors, and subcontractors undertaking the work for Respondents shall be subject to EPA review and approval. Respondents shall ensure that their contractors, subcontractors, and representatives receive a copy of this Order and comply with this Order. Respondents shall be responsible for any noncompliance with this Order.

27. If EPA disapproves of any person's or contractor's technical or work-experience qualifications, EPA will notify the Respondents in writing. Respondents shall, within five (5) working days of Respondents' receipt of EPA's written notice, notify EPA of the identity and qualifications of the replacement(s). Should EPA disapprove of the proposed replacement(s), Respondents shall be deemed to have failed to comply with the Order.

28. Respondents may propose to change the individual(s), contractor(s), or subcontractor(s) retained to direct and supervise the work required by this Order. If Respondents wish to propose such a change, Respondents shall notify EPA in writing of the name, title, and qualifications of the proposed individual(s), proposed contractor(s), or proposed subcontractor(s), and such individual(s), contractor(s) or subcontractor(s) shall be subject to approval by EPA in accordance with the terms of Paragraphs 26 and 27, above. The naming of any replacement(s) by Respondents shall not extend any deadlines required by this Order nor relieve the Respondents of any of their obligations to perform the work required by this Order.

29. Respondents will notify EPA of the respective field activities at least twenty-four (24) hours before initiating them so that EPA may adequately schedule oversight tasks.

30. Respondents shall submit to EPA a certification that Respondents or their contractor(s) and subcontractor(s) have adequate insurance coverage or other ability, subject to

approval of EPA, to compensate for liabilities for injuries or damages to persons or property that may result from the activities to be conducted by or on behalf of Respondents pursuant to this Order. Adequate insurance shall include comprehensive general liability insurance and automobile insurance with limits of one million dollars, combined single limit. If the Respondents demonstrate by evidence satisfactory to EPA that any contractor or subcontractor maintains insurance equivalent to that described above, or insurance covering the same risks but in a lesser amount, then the Respondents need provide only that portion of the insurance described above that is not maintained by such contractor or subcontractor. Respondents shall ensure that such insurance or indemnification is maintained for the duration of performance of the work required by this Order. Respondents shall ensure that the United States is named as an additional insured on any such insurance policies.

C. General Provisions:

31. All work required by this Order shall be conducted in accordance with CERCLA, the NCP, EPA Region 9 "Guidance for Preparing Quality Assurance Project Plans for Superfund Remedial Projects" (EPA, November 1992), any final amended or superseding versions of such documents provided by EPA, other applicable EPA guidance documents, any Work Plan or individual components approved pursuant to Paragraph 21 of this Order; and any report, document, or deliverable prepared by EPA because Respondents failed to comply with this Order.

32. All plans, schedules, and other reports that require EPA's approval and are required to be submitted by the Respondents pursuant to this Order shall, after approval by EPA, be incorporated into and enforceable under this Order.

33. EPA will oversee Respondents' activities as specified in Section 104(a)(1) of

CERCLA, 42 U.S.C. § 9604(a)(1). Respondents will support EPA's initiation and implementation of activities needed to carry out its oversight responsibilities. Respondents also shall cooperate and coordinate the performance of all work required to be performed under this Order with all other work being performed at the Site, including work performed by EPA, the State, or any other party performing work at the Site with the approval of EPA.

34. Respondents shall perform all actions required by this Order in accordance with the requirements of all applicable local, state, and federal laws and regulations unless an exemption from such requirements is specifically provided under CERCLA or unless the Respondents obtain a variance or exemption from the appropriate governmental authority. In accordance with 40 C.F.R. § 300.415(i), all on-site actions required pursuant to this Order shall, to the extent practicable, as determined by EPA, considering the exigencies of the situation, attain applicable or relevant and appropriate requirements (ARARs) under federal environmental, state environmental, or facility siting laws.

X. NOTICE OF INTENT TO COMPLY

35. Respondents shall, within two (2) working days of the Effective Date of this Order, provide written notice to EPA of Respondents' irrevocable intent to comply with this Order. Failure to respond, or failure to agree to comply with this Order, shall be deemed a refusal to comply with this Order.

XI. OPPORTUNITY TO CONFER

36. Respondents may, within two (2) days of receipt of this Order, request a conference with the Section Chief of the Emergency Response Section in the Response, Planning, and Assessment Branch in the EPA Region 9 Superfund Division, or whomever the Section Chief may designate. If requested, the conference shall occur within three (3) days of the

request, unless extended by mutual agreement of the Parties, at EPA's Regional Office, 75 Hawthorne Street, San Francisco, California.

37. At any conference held pursuant to Respondents' request, the Respondents may appear in person, or be represented by an attorney or other representative. If Respondents desire such a conference, Respondents shall contact Sara Goldsmith, EPA Assistant Regional Counsel, at (415) 972-3931.

38. The purpose and scope of any such conference held pursuant to this Order shall be limited to issues involving the implementation of the Response Action required by this Order and the extent to which Respondents intend to comply with this Order. If such a conference is held, the Respondents may present any evidence, arguments, or comments regarding this Order, its applicability, any factual determinations on which the Order is based, the appropriateness of any action that the Respondents are ordered to take, or any other relevant and material issue. Any such evidence, arguments, or comments should be reduced to writing and submitted to EPA within three (3) days following the conference. This conference is not an evidentiary hearing, and does not constitute a proceeding to challenge this Order. It does not give Respondents a right to seek review of this Order, or to seek resolution of potential liability, and no official record of the conference will be made. If no conference is requested, any such evidence, arguments, or comments must be submitted in writing within three (3) days following the Effective Date of this Order. Any such writing should be directed to Sara Goldsmith, at the following address:

Environmental Protection Agency
75 Hawthorne Street, ORC-3
San Francisco, CA 94105

39. Respondents are hereby placed on notice that EPA will take any action that may be necessary in the opinion of EPA for the protection of public health and welfare and the

environment, and Respondents may be liable for the costs of those actions under Section 107(a) of CERCLA, 42 U.S.C. § 9607(a).

XII. ENDANGERMENT AND EMERGENCY RESPONSE

40. In the event of any action or occurrence during the performance of the work that causes or threatens to cause a release of a hazardous substance or that may present an immediate threat to public health or welfare or the environment, Respondents shall immediately take all appropriate action(s) to prevent, abate, or minimize the threat, and shall immediately notify EPA's primary OSC, or, if the primary OSC is unavailable, EPA's alternate OSC, as designated below in Paragraph 46. If neither of these persons is available, Respondents shall notify the EPA Emergency Response Unit, Region 9, by calling (800) 300-2193. Respondents shall take such action(s) in consultation with EPA's OSC and in accordance with all applicable provisions of this Order, including but not limited to the approved Health & Safety Plan.

41. Nothing in the preceding Paragraph shall be deemed to limit any authority of the United States to take, direct, or order all appropriate action to protect human health and the environment or to prevent, abate, or minimize an actual or threatened release of hazardous substances at or from the Site.

XIII. MODIFICATION OF WORK REQUIRED

42. In the event of unanticipated or changed circumstances at the Site, Respondents shall notify the EPA OSC by telephone within twenty-four (24) hours of discovery of the unanticipated or changed circumstances. This verbal notification shall be followed by written notification postmarked no later than within three (3) days of discovery of the unanticipated or changed circumstances.

43. The Branch Chief may determine that in addition to tasks addressed herein,

additional work may be required to address the unanticipated or changed circumstances referred to in Paragraphs 40 and 42. Where consistent with Section 106(a) of CERCLA, the Branch Chief may direct, as an amendment to this Order, that Respondents perform these tasks in addition to those required herein. Respondents shall implement the additional tasks that the Branch Chief identifies. The additional work shall be completed according to the standards, specifications, and schedules set forth by the Branch Chief in any modifications to this Order.

XIV. DESIGNATED PROJECT MANAGERS

44. EPA designates Rich Martyn, an employee of EPA Region 9, as its primary OSC and designated representative at the Site, who shall have the authorities, duties, and responsibilities vested in the OSC by the NCP. This includes, but is not limited to, the authority to halt, modify, conduct, or direct any tasks required by this Order or undertake the Response Action (or portions of the Response Action) when conditions at the Site present or may present a threat to public health or welfare or the environment as set forth in the NCP. Within three (3) days of the Effective Date of this Order, Respondents shall designate a Project Coordinator who shall be responsible for overseeing Respondents' implementation of this Order. To the maximum extent possible, all oral communications between Respondents and EPA concerning the activities performed pursuant to this Order shall be directed through EPA's OSC and Respondents' Project Coordinator. All documents, including progress and technical reports, approvals, and other correspondence concerning the activities performed pursuant to the terms and conditions of this Order, shall be delivered in accordance with Paragraph 23, above.

45. EPA and Respondents may change their respective OSC and Project Coordinator. Notification of such a change shall be made by notifying the other party in writing at least five (5) days prior to the change, except in the case of an emergency, in which case notification shall

be made orally followed by written notification as soon as possible.

46. Consistent with the provisions of this Order, the EPA designates Craig Benson as an alternate OSC, in the event Rich Martyn is not present at the Site or is otherwise unavailable. During such times, Craig Benson shall have the authority vested in the OSC by the NCP, as set forth in Paragraph 44 above.

47. The absence of the EPA OSC from the Site shall not be cause for the stoppage of work. Nothing in this Order shall limit the authority of the EPA OSC under federal law.

XV. SITE ACCESS

48. Respondents shall permit EPA and its authorized representatives, including its contractors and the State, to have access at all times to the Site to monitor any activity conducted pursuant to this Order and to conduct such tests or investigations as EPA deems necessary. Nothing in this Order shall be deemed a limit on EPA's authority under federal law to gain access to the Site.

49. To the extent that Respondents require access to property, owned by or in possession of someone other than Respondents, to carry out the terms of this Order, Respondents shall, within a reasonable time to implement the requirements of this Order, obtain access for EPA, its contractors, oversight officials, or other authorized representatives; state oversight officials or contractors; and Respondents and their authorized representatives. If Respondents fail to gain access within the time period necessary to implement the requirements of this Order, Respondents shall continue to use best efforts to obtain access until access is granted. For purposes of this Paragraph, "best efforts" include, but are not limited to, the payment of money as consideration for access. If access is not provided within the time referenced above, EPA may obtain access under Sections 104(e) or 106(a) of CERCLA and recover any costs incurred

pursuant to Section XVI of this Order.

XVI. REIMBURSEMENT OF OVERSIGHT COSTS

50. Respondents shall reimburse EPA, on written demand, for all response costs incurred by the United States in overseeing Respondents' implementation of the requirements of this Order, unless otherwise exempted from this requirement by federal law. EPA may submit to Respondents on a periodic basis a bill for all response costs incurred by the United States with respect to this Order. Respondents shall, within thirty (30) days of receipt of the bill, remit by cashier's or certified check for the amount of those costs made payable to the "Hazardous Substance Superfund," to the following address:

U.S. Environmental Protection Agency
Region 9 Superfund
P.O. Box 371099M
Pittsburgh, PA 15251

Respondents shall send a cover letter with any check and the letter shall identify the Alloc Electroplating Site by name and make reference to this Order, including the EPA docket number stated above. Respondents shall send notification of any amount paid, including a photocopy of the check, simultaneously to the EPA OSC.

51. Interest at the rate established under Section 107(a) of CERCLA shall begin to accrue on the unpaid balance from the due date of the original demand notwithstanding any dispute or objection to any portion of the costs.

XVII. DELAY IN PERFORMANCE

52. Any delay in the performance of any requirement of this Order that, in the EPA's sole judgment and discretion, is not properly justified by Respondents under the terms of this Section shall be considered a violation of this Order. Any delay in performance of any

requirement of this Order shall not affect any other obligation of Respondents under the terms and conditions of this Order.

53. Respondents shall notify EPA of any delay or anticipated delay in performing any requirement of this Order. Such notification shall be made by telephone to EPA's primary OSC within twenty-four (24) hours after Respondents first knew or should have known that a delay might occur. Respondents shall adopt all reasonable measures to avoid or minimize any such delay. Within three (3) days after notifying EPA by telephone, Respondents shall provide written notification fully describing the nature of the delay, any justification for delay, any reason why the Respondents should not be held strictly accountable for failing to comply with any relevant requirements of this Order, the measures planned and taken to minimize the delay, and a schedule for implementing the measures that will be taken to mitigate the effect of the delay. Increased costs or expenses associated with implementation of the activities called for in this Order are not justifications for any delay in performance.

54. If Respondents are unable to perform any activity or submit any document within the time required under this Order, the Respondents may, prior to the expiration of the time, request an extension of time in writing. The extension request shall include a justification for the delay. The submission of an extension request shall not itself affect or extend the time to perform any of Respondents' obligations under this Order.

55. If EPA determines that good cause exists for an extension of time, it may grant a request made by Respondents pursuant to Paragraph 54 above, and specify in writing to the Respondents the new schedule for completion of the activity or submission of the document for which the extension was requested.

XVIII. RECORD PRESERVATION

56. Respondents shall maintain, during the pendency of this Order, and for a minimum of five (5) years after EPA provides notice to Respondents that the work has been completed, a depository of the records and documents required to be prepared under this Order. In addition, Respondents shall retain copies of the most recent version of all documents that relate to hazardous substances at the Site and that are in their possession or in the possession of their employees, agents, contractors, or attorneys. After this five-year period, Respondents shall notify EPA at least thirty (30) days before the documents are scheduled to be destroyed. If EPA so requests, Respondents shall provide these documents to EPA.

XIX. ENFORCEMENT AND RESERVATIONS

57. EPA reserves the right to bring an action against Respondents under Section 107 of CERCLA, 42 U.S.C. § 9607, for recovery of any response costs incurred by the United States related to this Order or otherwise incurred at the Site and not reimbursed by Respondents. This reservation shall include but not be limited to past costs, direct costs, indirect costs, the costs of oversight, and the costs of compiling the cost documentation to support oversight costs, as well as accrued interest as provided in Section 107(a) of CERCLA, 42 U.S.C. § 9607(a).

58. Notwithstanding any other provision of this Order, at any time during the Response Action, EPA may perform its own studies, complete the Response Action (or any portion of the Response Action) and seek reimbursement from Respondents for its costs, or seek any other appropriate relief.

59. Nothing in this Order shall preclude EPA from taking any additional enforcement action, including modification of this Order or issuance of additional Orders, or additional remedial or removal actions as EPA may deem necessary, or from requiring Respondents in the

future to perform additional activities pursuant to CERCLA, 42 U.S.C. § 9607(a), et seq., or any other applicable law. Respondents may be liable under CERCLA Section 107(a) for the costs of any such additional actions.

60. Notwithstanding any provision of this Order, the United States hereby retains all of its information gathering, inspection, and enforcement authorities and rights under CERCLA, the Resource Conservation and Recovery Act, or any other applicable statutes or regulations.

61. Notwithstanding compliance with the terms of this Order, including the completion of the EPA-approved Response Action, Respondents are not released from liability, if any, for any enforcement actions beyond the terms of this Order taken by EPA.

62. EPA reserves the right to take any enforcement action pursuant to CERCLA or any other legal authority, including the right to seek injunctive relief, monetary penalties, reimbursement of response costs, and punitive damages for any violation of law or this Order.

63. EPA expressly reserves all rights and defenses that it may have, including EPA's right both to disapprove of work performed by Respondents and to request the Respondents to perform tasks in addition to those detailed in Section IX of this Order.

64. This Order does not release Respondents from any claim, cause of action, or demand in law or equity, including, but not limited to, any claim, cause of action, or demand that lawfully may be asserted by representatives of the United States or the State.

65. No informal advice, guidance, suggestions, or comments by EPA regarding reports, plans, specifications, schedules, and any other writing submitted by Respondents will be construed as relieving Respondents of their obligation to obtain such formal approval as may be required by this Order.

XX. SEVERABILITY

66. If any provision or authority of this Order or the application of this Order to any circumstance is held by a court to be invalid, the application of such provision to other circumstances and the remainder of this Order shall not be affected thereby, and the remainder of this Order shall remain in force.

XXI. DISCLAIMER

67. The United States, by issuance of this Order, assumes no liability for any injuries or damages to persons or property resulting from acts or omissions by Respondents, or their employees, agents, successors, assigns, contractors, or consultants in carrying out any action or activity pursuant to this Order. Neither EPA nor the United States shall be held as a party to any contract entered into by Respondents, or their employees, agents, successors, assigns, contractors, or consultants in carrying out any action or activity pursuant to this Order. This Order does not constitute a pre-authorization of funds under section 111(a)(2) of CERCLA, 42 U.S.C. § 9611(a)(2).

XXII. PENALTIES FOR NONCOMPLIANCE

68. Respondents are advised pursuant to Section 106(b) of CERCLA, 42 U.S.C. § 9606(b), that violation of this Order or subsequent failure or refusal to comply with this Order, or any portion thereof, may subject Respondents to a civil penalty of up to \$32,500 per day for each day in which such violation occurs, or such failure to comply continues. Failure to comply with this Order, or any portion thereof, also may subject Respondents to liability for punitive damages in an amount three times the amount of any cost incurred by the government as a result of the failure of Respondents to take proper action, pursuant to Section 107(c)(3) of CERCLA, 42 U.S.C. § 9607(c)(3).

XXIII. TERMINATION AND SATISFACTION

69. The provisions of this Order shall be deemed satisfied on Respondents' receipt of written notice from EPA that Respondents have demonstrated to the satisfaction of EPA that all of the terms of this Order, including any additional tasks that EPA has determined to be necessary, have been completed.

Unilateral Administrative Order 9-2005-07

IT IS SO ORDERED:

UNITED STATES
ENVIRONMENTAL PROTECTION AGENCY

By: _____

Date: 18 February 2005

Daniel A. Meer
Branch Chief, Response, Planning and Assessment Branch
